BRISBANE COMMITTEE MAKES AN ATTEMPT TO BUY ROAD MATERIAL WITH FUND OF DEFUNCT UTILITY

Rock And Oil Made Available To Macadamize 3000 More Feet Of Streets

The Brisbane street committee—E. C. Woods, chairman; W. F. Miller, Lou Terry, C. Wilson and A. Thomas—reported to a mass meeting held Thursday evening of this week at the Social Club Hall three results of their investigations during the past week:

1—That street work was stopped in Brisbane because money was not available to buy material.

2—That WPA labor to finish the job may be had providing top rock and oil can be obtained.

3—That state law prohibits the turning of funds of a defunct Brisbane public utility to the purchase of additional material. However, a proposal is now pending in the state Legislature which, if passed, will make such procedure possible.

A petition bearing the names of 108 Brisbane citizens was filed with the county clerk this week requesting that utility money be used to buy material and finish the road project. The street committee reported that it had communicated with Senator Parkman and asked him to do everything in his power to

PROTECTION IS GIVEN BY NEW FIRE HYDRANTS

Brisbane Water Company and Visitacion Valley Water Works Install Large Pipe

The Brisbane Water Company and Visitacion Valley Water Works has installed more than 1200 feet of six inch water main in the upper portion of the Brisbane Tract. The company plans to lay approximately 700 more feet of pipe, and if a decision now pending with the Railroad Commission is favorable it will install eighteen fire hydrants throughout Brisbane.

Hydrants are scheduled for immediate installation at Sierra Point road and Glen Park way, El Dorado street in front of the school and at San Bruno avenue and Glen Park way. The job, when completed, will cost approximately $20,000.

The laying of six inch mains and installation of fire hydrants throughout the tract will give Brisbane adequate fire protection.

County Commission Visits Public Park

Recreation facilities at Memorial Park were inspected, last week, on an all day field trip by the recreation commission of San Mateo County.

In addition, the commissioners looked over the site of the reservoir which is soon to be constructed on Peterson Creek to provide an adequate park water supply.

Two hundred picnic tables and 75 fireplaces have been constructed at the park by Emergency Conservation Work camp laborers, the commissioners learned.

Steel Girders Going Up On High Gym

Contractors this week hoisted steel girders into place as work on the new Jefferson Union High School gymnasium progressed in rapid sequence. Engineers announced that by the end of next week all structural steel work on the gym would be completed.

Concrete was poured this week in forms for floors of the gym lobbies and for the swimming pool. Plumbing is being roughed in the groundwork.

Joe Millett, building inspector for the high school board, and Frank Reilly, engineer for the contractors, are supervising the construction work.

GEORGE BERNARD SHAW WILL VISIT JEFFERSON HIGH

Ten Act Marionette Show Of Federal Theaters To Go On Local Stage

George Bernard Shaw will visit Daly City Wednesday afternoon, April 28. He will make an appearance at the Jefferson Union High School Auditorium at the head of his own company, a troupe of marionettes. Shaw, himself, is a marionette in this instance.

The occasion will be one of the first "on the road" dates of the traveling marionette company of the Federal Theaters.

TEN ACTS

The performance is booked as "Marionette Varieties." It consists of nearly ten acts, each a separate and individual characterization of some world celebrity or type. Besides Shaw, who will act as master of ceremonies and introduce the various acts, there will be the Dionne quints in a special "Good Morning, Daly City," tap dance with topical patter; Toscanini, the great composer and director, at the head of a big philharmonic orchestra; Mme. Tilly, coloratura soprano typical of all coloratura sopranos of a few years back; Bill Robinson, king of tap dancers, in his own routine; some one act sketches that have won wide acclaim, and La Tour Brothers, great French acrobats whose technique ended all technique for the knights of the perspiring palm and handkerchief jugglers.

It's a great show from beginning to end. It's the first show on the road in the marionette division and if the people of Daly City like it others will be brought on at a later date.

Robert Southey, the English poet, was expelled from school in the 1780's for writing an essay against flogging.

Okehs Labor Act

Charles Evans Hughes

Chief Justice Charles Evans Hughes, who read one of the majority opinions when the United States Supreme Court recently returned five momentous decisions upholding the constitutionality of the Wagner Labor Act. The distinguished jurist had celebrated his seventy-fifth birthday the day before.

Equestriennes Freshen Up For First Cal. Rodeo

Pictured as they used a horses' watering trough to "spruce up" in, rodeo "nymphs" Evelyn Jones and Margaret Gainsford, both candidates for queen of the King City, Cal., Stampede, are seemingly unmindful of the thirsty horse in the background. The stampede will be the first of California rodeos and will be held May 15-16. Many unusual features are planned for the event, but wild cow milking is believed by many to be the most amusing of the scheduled contests.

PUBLICITY BOOK OF BRISBANE P.T.A. WINS FIRST PLACE IN SEVENTEENTH DISTRICT JUDGING

Nineteen Other Units Make Entries—Locals Rated 100 Per Cent

In competition with nineteen publcity books from Parent Teacher Associations of the Seventeenth District, the entry of the Brisbane unit was rated 100 per cent perfect, 10 per cent higher than the winner of second place, was awarded a blue ribbon and was sent to the convention of the State Congress of Parent Teacher Associations to be held at Pasadena the week beginnnig April 25. President of the local unit, Mrs. Ethel Jonas, and the publciity chairman, Mrs. Dollie Wilson, will attend the Pasadena conventon.

The Seventeenth District publicity books were judged and rated last week. Public announcement of the winners and awards was made at P. T. A. meetings held, Thursday and Friday of this week, in the San Mateo Theater at San Mateo.

FEATURES

Outstanding features of the Brisbane publicity book, which won frst prize for the local unit, were: Rigid adherence to all rules with every requirement fulfilled, newspaper sto-

Auto Owner Sleeps, Car Stolen, Found

Police recovered, early Tuesday morning of this week, the stolen automobile of E. Desmond, Irvington street, before he knew it was missing.

The boys in the car, Earl Ward, 13, 600 Niantic street, and Paul Jones, 14, 90 Douglas street, were taken into custody by officers on Junipero Serra boulevard at 3:30 a. m. and turned over to juvenile authorities.

Because Desmond had purchased the automobile only a few days ago and the former registered owner could not be located, police were unable to inform him that the car had been found.

He found out about it when he came into the police station at 9 o'clock in the morning to report that the car had been taken from the front of his home, where he parked it the night before.

$100,000 SUIT FOR DEATH OF DOYLE IS FILED

Widow And Son Charge That Alleged Carelessness On Part Of Street Car Was Cause Of Accident

The widow and son of the late John T. Doyle, former Daly City chief of police, had on file, Friday of last week, in Superior Court at Redwood City a damage suit of $100,000 for the death of their husband and father, which occurred December 19.

Mrs. Mae S. Doyle and son Thomas, 16, are suing the Market Street Railway Company, Luther Milliken, motorman, and Alfia Pennise, conductor. A coroners jury decided Patrolman Doyle was killed by a street car, although witnesses insisted he was the victim of a hitrun driver while he was escorting a pedestrian to a Daly City street car stop.

The kin charge that the alleged carelessness on the part of the street car company was responsible.

$1060 For County From President Ball

Final report on the President Birthday Ball, held at Tanforan Clubhouse January 30, was announced this week by the secretary for the county birthday ball committee.

A total of $454 has been sent to President Roosevelt for the Warm Springs, Ga., foundation to fight infantile paralysis. The remainder, $1060, has been retained for similar purposes in San Mateo County.

The committee will hold its final meeting May 1 to determine proper method of spending this sum.

Vagabond Sketches
by DON AMES

RELIEF ON STRIKE—Of course there is no relief that is on strike and at the same time in existence. If relief did have a walkout, this country would suffer from acute prosperity.

But what does seem highly ridiculous is the fact that persons on relief should strike for a wage increase. They do not seem to realize that they are fortunate to be earning anything. I refer to the recent WPA walkouts.

At present the federal government is not so managed that it has become a capitalist, money making organization.

TODAY'S EPIGRAM—Flattery is food for fools.—H. O. Hopkins.

S. M. Flier Cited For Low Cruising

Paul Mantz, former San Mateo flier and now technical adviser on flying for Amelia Earhart, was cited, Monday of this week, to the Bureau of Air Commerce by deputy sheriffs of Los Angeles for allegedly flying low over Santa Anita.

Deputies reported they had received many complaints from Arcadia residents about low flying and stunting. The officers said they went to the track and sighted a plane flying about 150 feet off the ground.

They took the numbers of the plane and reportedly found it was registered to Mantz.

Mantz said a low hanging fog had forced him to fly nearer the ground than customarily, but denied he had been stunting.

LEGION AUXILIARY DISCUSSES WELFARE

The regular meeting of District No. 26, American Legion Auxiliary, held recently in San Mateo Legon Hall, was devoted to child welfare. The month of April has been designated by the American Legion Auxiliary as Child Welfare Month. Although work in child welfare is continuous throughout the year, the organization has chosen this month for special attention and discussion of this phase of the program.

An invitation was issued to all who are interested in child life in the county. Discussion was held on child welfare problems with a hope that the work of the auxiliary in the county would be benefited.

PREDICT HUGE CELEBRATION OF BRIDGE OPENING

Season Of Year And Return Of Prosperity Drives Enthusiasm To Peak

Leaders in the Golden Gate Bridge Fiesta are optimistic.

They predict it will be the greatest celebration ever held in the San Francisco bay area.

Excepting the Panama-Pacific Exposition in 1915, which is not comparable, the liveliest fete in the history of this territory was the first Portola which celebrated a wonderful achievement of modern civilization, the resurrection from ashes debris of 1906.

The celebration in honor of the completion of the bay bridge was a fine spectacle, but the season, November, and the stress of the election just closed then, prevented the city from doing its giddiest best in the way of festivity.

HELD IN MAY

But the Golden Gate Bridge fete comes in the merry month of May, comes at a time ripe with return of prosperity and honors a magnificent engineering and public achievement, the spanning of the Golden Gate.

The time, place and occasion are propitious for a splendid event.

Everyone is supporting the festival with funds and ideas to make it a gorgeous success.

BOARD PASSES ON ALTERNATIVE CHARTER MOVE

By 3 To 1 Vote Supervisors Offer New Proposal For Petition

By a vote of 3 to 1 the Board of Supervisors, Wednesday afternoon of this week, approved an alternative proposition on the question of appointing the county executive and ordered it placed on the same ballot with the charter amendment as outlined in recently circulated petitions.

Supervisor Hatch, Half Moon Bay, who opposed joint submission, said the electors should be given the opportunity to vote on an issue "which is not complicated."

Supervisor James, sponsor of the alternative, said the board owed it to Ernest A. Rolison, who gave up a position to take over executive duties of the county. He said the proposition to safeguard the executive job would "save the charter from being scrapped." Supervisors Beer and Poole joined him in an affirmative vote.

Native Sons Will Dedicate Bridge

The actual dedicatory ceremonies upon the opening of the Golden Gate Bridge, largest span in the world, will be performed by the Grand Parlor of the Native Sons of the Golden West on May 27, it was reported this week.

The dedication ceremonies will take place at high noon, May 27, on the toll plaza situated on the San Francisco end of the great suspension bridge.

The ceremony of placing a bronze plaque on the bridge will be performed by the officers of the Grand Parlor of the Native Sons.

Probable Cause Of Mills Crash Set

The Bureau of Air Commerce announced officially in Washington this week that the probable cause of the Mills Field air crash on February 9 was the accidental lodging of a microphone in the controls, causing them to jam.

Eleven persons were killed in the crash.

"A detailed investigation of the wreckage showed no evidence of failure in the air of the airplane structure, engines or propellors," the bureau reported.

Now I Ask What Was This and That? Then Give Answers

NOW I ask you:

What was the first intercollegiate sports event ever held in the United States?

When was ice hockey first played in the United States? What town produced the first amateur team?

What great prizefighter, fearing that he would be poisoned, cooked his own food for four days before battling for a championship?

When were women first permitted to compete in Olympic track and field events?

Who were the members of the first United States Davis cup team, where, and when were the first matches played?

What prize fight weight class has had its limits stretched widest and changed most often in this country?

What, probably, was the highest box office price ever charged for a wrestling match?

How big and how old was Bobby Jones when he competed in his first National Golf championship? When? Where?

Who was the first American to win a modern Olympic championship?

What was the "turtleback" play in football, and when was it first used?

Oh yes, of course, the answers:

The Yale-Harvard boat race at Lake Winnipesaukee, N. H., on August 23, 1852. The superintendent of the Boston, Concord and Montreal railroad suggested the race and paid all expenses for the crews. He was the prophet of the vast modern tribe of go-getters, who combine business and sport to the well-publicized profit of all concerned, and his aim was to acquaint the world with the beauties of the White Mountain region. The build-up was successful. A large crowd was present and Franklin Pierce, candidate for the presidency of these United States, made a swell speech.

Two Canadian professional teams were tempted by a Brooklyn promoter to introduce ice hockey into this country during the winter of 1897-98. There was so little ice and interest that the thing was a flop. During the next winter Boston organized an amateur team which, for the same reasons, fared as sadly as did the pros.

While training in New Orleans for his fight with Paddy Ryan in February, 1882, John L. Sullivan became sorely suspicious both of his opponent and of his best friends. So he became his own chef and the best evidence that his cooking did him no harm is contained in the fact that he kayoed Ryan in the ninth round, thus becoming heavyweight champion of America.

During the games at Amsterdam in 1928. Previous to that, though, they had competed in such other sports as tennis, figure skating, swimming and gymnastics.

Dwight F. Davis, Holcombe Ward, Malcolm D. Whitman. Longwood Cricket Club (Massachusetts). August 7, 1900.

Bantamweight. It started at 105 pounds, was raised to 112 and then to 116 before reaching its present limit of 118.

The first Hackenschmidt-Gotch bout, held in Chicago in 1908, so intrigued the financial leaders that they coughed up $40 a copy for the best ringside seats.

Fourteen years and six months old. Five feet four inches tall. Weight 165 pounds. Merion Cricket Club, Philadelphia, 1916.

The first event to be completed at Athens in 1896 was the hop, step and jump (referred to in newspapers of the day as the "triple jump"). It was won by James B. Connolly of South Boston, who resigned from Harvard to compete in the event and who later became a distinguished writer of sea tales.

A mass play in which the eleven men of the attacking team formed a solid oval, usually directly opposite a defending tackle. When the ball was snapped into the interior of the oval the mass rolled out around the end, thus unwinding the runner into a clear field. It was first used in the Harvard-Yale contest of 1893.

• • •

Richard Tam, Stanford's varsity second baseman, is the first Japanese in the school's history to play on a major sports team. . . Clark Griffith is a stickler for flat foot pitching. . . He believes it is more conducive to control than taking the pitching stride on the toe. . . Walter Vance, a member of Northwestern's freshman basketball team this season, is a brother of Norm Vance, who has just wound up three years of varsity competition with the Wildcats.

NOT IN THE BOX SCORE:

TWENTY years ago he was a pitcher to be reckoned with in Decatur, Moline, Springfield, Peoria and those other Illinois towns where semi-pro rivalries are hot. Once he pitched a no hit game against well favored opponents. Again he pitched and won two games in widely separated towns on one afternoon. All the while he was possessed of superb confidence to go along with a sharp breaking curve. Then one day a faded minor leaguer took him aside.

"Charley," counselled the veteran, patting him atop his five feet five inches of bone, muscle and pompadour, "You're too little to go far in this game as a pitcher. But you can hit pretty well and you're fast, smart and aggressive. Why don't you try the infield?"

The winning pitcher became a struggling infielder the next day. But he did not have to struggle for long. Soon he was mastering the fine points and was moving up in the ranks of the minors as a star. Then there were long, successful seasons. with big time clubs—one of them a world series winner—as regular third baseman and utility man.

After that he became a Southern Association manager, was doing a tidy job with a firmly established organization. He received a big time offer. The club was a hopelessly scrambled tailender, deserted by the fans and an eyesore to the game. Friends advised him to await slow, sure advancement in the minors rather than risk all with this wreck of a club.

The little pitcher who used to bend curves across the letters of semi-pro batters when the count was three and two did not hesitate. He took the job. That was only a couple of seasons ago. In 1936 the wrecked outfit with which he made his debut had been revitalized into a fifth place team. This year the odds are long that Charley Dressen will lead Cincinnati's Reds far higher.

Charley Dressen

Charley thinks so himself. "Why shouldn't I?" he asks. "You don't get any place in life trying to live on past performances. You've got to keep moving and aim high. What would it get us worrying about the Dodgers and those other clubs who finished in second division last year? Maybe they've improved. Maybe they haven't. I know we have. So what we're figuring on now is big game, those guys who've been up in the money practically every year.

"What clubs can be caught? Why bar any of them? With one or two exceptions this is a pretty evenly balanced league. Everybody's got little weaknesses along with strength, too. Take the Giants. Maybe they're as good in the infield as they were with Jackson at third and Terry at first. Maybe they're not. What do you think?

"Take the Pirates. They're good, maybe the best in the league. But you haven't heard of them winning any pennants recently, have you? Or the Cubs. You don't know of any law that says they've got to beat us, do you? Neither do I and that goes for the Cards, too. I'll have to see how well they do at first, second and third before I break out in a fright every time I hear about them. Meanwhile, I'll offer a hint. That Dean's a great pitcher who ought to help almost any club. If they're interested I'm ready to answer telegrams.

Dodger Trade Still Favored by Dressen

Would Cincinnati be interested in any other deals? "Sure," answered Dressen. "We were ready to deal last winter. For instance we offered to make Brooklyn into a ball club in return for Mungo. Well, we're still ready to go to our right and left and to give prompt response."

What made the manager so sure his club was improved? "Well, Gilbert for one. Charley's leg isn't bothering him at all now and he'd be a swell replacement for second or third if anything happened. Then, speaking of legs, Kiki Cuyler's gams were better than they'd been for several seasons. With Scarsella looking far better at first and with Goddman continuing to show vast improvement in the outfield a manager had a lot of weight taken off his mind."

How about the rest of the outfield? "Well, young Dwyer who's played semi-pro around Newark and Connecticut and Pennsylvania can slap those doubles and he's really coming along fast. Then there's Phil Weintraub. I had him in Nashville when he was a rookie and I understand him. Probably he'll never be one of those birds who can make pretty shoe string catches but he has improved in the field and we think he can hit. When you've got guys like Lombardi and Davis who can powder that ball, too, a manager's got something to be happy about.

Pitching? "We've got some youngsters who look good, particularly a boy named Lloyd Moore. We're teaching him to curve that three and two ball now. It takes courage and control to throw it but it makes a sucker out of the batter and is becoming one of the best pitches a guy can have in the majors.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Indians of Arizona Learned to Live in Land of Contrasts

Hopi Most Advanced Tribe in Farming

Washington.—Indians in Arizona, and the white farmers who took over part of the land after them, have had to adapt themselves to many contrasts in living conditions, Dr. H. L. Shantz of the United States Department of Agriculture told an audience of his fellow-botanists in an address here.

Arizona is a land of many contrasts, he pointed out. Its "low spot" is only 137 feet above sea level; the peaks of its highest mountains rise above 12,000 feet. Its normally dry climate is broken into twice a year by well-marked rainy seasons, and sometimes punctuated with cloudbursts. Temperatures have ranged from 25 below zero to 127 above.

It's a World in Itself.

Of its total area, 42 per cent is desert, 23 per cent natural grassland, and 36 per cent is distributed among three types of forest. At the top of the San Francisco peaks there are tiny patches of real Alpine meadow. Of 18 great world types of vegetation, Arizona has 9; of 22 types distinguished in this country, the state has 12. It is a world in itself.

In this world dwell Indian tribes of most diverse agricultural abilities. Heading the list are the Hopi, who raise ample crops of corn, beans, melons, squashes, and other produce, irrigating them with mere cupfuls of water. They have developed a variety of corn able to sprout successfully if planted 14 inches deep, whereas the white man's corn dies if planted more than three inches deep.

Less careful farmers, but living by agriculture still, are the Pima and the Papago tribes. They are not nearly as systematic irrigators as the Hopi, and they raise their crops to some extent by dry-farming methods. They also make use of native food sources such as cactus fruits and mesquite beans.

Least agricultural are the Apache and Navajo. Originally roving, often predatory, in their habits, they have given up hunting and warfare only under white men's restraint. The Apache are learning to grow corn; the Navajo have become herdsmen, famous for their great flocks of sheep and for the beautiful rugs they weave from the wool.

Plants Need "Sleep" at Night to Have Normal Growth

Washington.—Nightly sleep, or something very like it, is as necessary to plants as it is to men and animals, recent researches at the Smithsonian institution indicate. The work was done by Dr. Earl S. Johnston of the Smithsonian institution and Dr. Paul R. Burkholder of Connecticut college.

It has to do with the physiological reaction to light on the part of auxins, the substances within plants that cause growth. Strong sunlight was found to be destructive to the auxins, while "controls" containing like amounts of the substances were left with much greater growth-promoting power after being "exposed" to darkness for equal periods.

The destruction or inactivation of the growth substances, the experimenters found, varied with the length and intensity of the illumination. It also varied, as might have been expected, with the species of plant. Some plants, such as the sunflower, are much more sensitive than others—so sensitive, in fact, that their movements seem superficially to be controlled by an animal-like intention.

Shelterbelt Trees Live Despite the Drouths

Washington.—Trees planted in the West's much-controverted shelterbelt area show high survival percentage despite two years of desperate drouth, the United States forest service reports. Survivals average 550 trees to the acre, out of an average of 740 planted.

Chinese elm and cottonwood that were 18 inches high when planted in the spring of 1935 are now 15 and 16 feet high. Species showing best growth include green ash, cottonwood, Chinese elm, red cedar and Ponderosa pine.

Life Is Longer and Better, Thanks to Work of Scientists

Dr. C. C. Furnas Tells of Big Improvements

LONGER life, biologically better life, and an easier life. That is science's gift to mankind. Dr. C. C. Furnas, Yale professor of chemical engineering and author of a stimulating book, "The Next Hundred Years," summarized in a recent address what science and technology are doing to us. The record is encouraging.

The expectancy of life at birth has risen from less than forty years in 1830 to almost sixty years at present. The expectancy for all ages up to sixty has increased. Of each one thousand people born this year, almost 30 per cent more will survive to age fifty than will survive in a similar group born in 1900.

Science is giving us a biologically better life as well as a longer one, Dr. Furnas contends. Most epidemics have been eliminated. Tuberculosis is on the run. Even cancer is beginning to think about slipping. Colds, influenza, infantile paralysis and the various diseases of senility are still to be touched but they will be, and perhaps surprisingly soon.

People Learning About Diet.

Dietary deficiency diseases are on their way out and will soon be a rarity. Dr. Furnas feels that the average diet is still very poor but it is improving. The public is learning, he said, that the over-purified foods such as granulated sugar and white flour are poor substitutes for food and that there is a great virtue in the protective foods: vegetables, fruits and milk. They are responding to the exhortations of science and the health of the next generation will show it.

The material side of life is improving. Dr. Furnas observes that the cave man expended almost 100 per cent of his efforts in getting his meals. By the time of a certain tea party in Boston that figure had dropped (for Americans) to 56 per cent. That is, in 1775 56 per cent of the average American income went for food. By 1931 that had dropped to 38 per cent. In other words the struggle to fill the stomach has steadily become less severe, which leaves a larger part of the average dollar to be spent for other things.

The item of "sundries" which includes education, travel, books, all recreation, rose from eight per cent of the average American income in 1775 to 24 per cent of the income in 1931. This is a three-fold increase and is tremendously significant. We now spend three times as much on the extra-curricular activities, which are the most pleasant part of life, as did the revolutionists. We are now spending five billion dollars per year on education and 10 billion for recreation. One would almost think we were leading a profitable and pleasant life. Despite this higher standard of living we are working less.

Between 1900 and 1930 the average real wage, in terms of standard commodities such as food, rose 48 per cent while the average working week dropped almost 15 per cent. The long time trend since the depression is not yet quantitatively discernible but it will undoubtedly be upward for wages and downward for hours.

"This is all to the good," says Dr. Furnas. "Note that I am not saying that life for the average man is good as yet, I am only saying that it is better than it was, much better."

Shortest of Radio Waves Being Used at Ann Arbor

ANN ARBOR.—The shortest continuous radio waves ever produced are being used in experiments at the University of Michigan here. They are only 6.4 millimeters (about one-quarter inch) in wavelength, report Drs. C. E. Cleeton and N. H. Williams of the department of physics.

So tiny is the tube used to generate the waves that it is assembled under a magnifying glass and its outside dimension is less than one quarter of an inch, state the scientists in their report to the Physical Review.

Radio radiation generated by the equipment is being used for studies of the molecular structure of gases including water vapor. The minute rays have many of the properties of light and travel in straight lines when focused by a concave mirror. Pieces of black paper, hard rubber and wood are transparent to the rays.

The possibility of using them for communication purposes is remote since they are rapidly absorbed by the water vapor in the atmosphere. It is by a study of this absorption, in fact, that scientists are learning new facts about the molecular makeup of water vapor.

The 6.4-millimeters radio waves represent about the limit of radiation which can be produced from vacuum tube sources.

CALIFORNIA News of the Week

Artesian Well Offered to State

Napa.—An artesian well producing more than 720,000 gallons a day has been offered the State by Mrs. Jessie Robson Chinn of Oakville, for supplying four state institutions in the county, as an alternative to a $1,250,000 Rector Canyon dam project being considered by the legislature.

Youth Hostels Advocated

Tulare.—A movement has been started here to have community committees in Tulare County sponsor "youth hostels" as part of the American Youth Hostel chain. The hostels would bring thousands of hikers and bicyclists to see the Big Trees, it is believed.

L. A. Flag Has Everything

Los Angeles.—Los Angeles' official flag, just raised, includes everything but the tourist trailers. Its green stands for olive trees, yellow for oranges, red for the wine. A seal embraces flags of Spain, Mexico, California Bear Flag, and the American flag.

Four Die in Naval Plane Crash

San Diego.—Four naval airmen were drowned when two scout planes fell into the sea 40 miles southwest of Point Loma after a head-on collision in mid-air. All of the victims were attached to Scouting Squadron 3 of the Fleet Air Base, North Island, operating from the aircraft carrier Lexington.

Sierra Railroad Auctioned

Sonora.—The Sierra Railway, started 40 years ago, was sold for $360,000 at public auction to a committee of six bondholders and became the Sierra Railroad Company. Purchase of the property, which includes 58 miles of main line track from Oakdale to Tuolumne with a branch line to Melones dam, was negotiated by a group of bondholders headed by C. C. Kreis of San Francisco.

Thief Takes Iron Doors, Shutters

Marysville.—A husky thief carted of two heavy iron shutters and two metal doors from the historical adobe house at French Corral, one of Yuba County's oldest landmarks. Surrounding the adobe building in its prime, along in the 50's, rich mining grounds were prospected and several rich pockets were discovered. The town took its name from the fact that most of the residents were from France.

Boat Arrival Causes Commotion

Tehama (Tehama Co.)—Merchants shut up shop, children cut school and farmers left their fields—all to gaze in pop-eyed wonderment at the first river steamer to reach this point on the upper waters of the Sacramento River in twenty years. The 70-foot stern-wheeler carried a group of United States Army engineers on a trip of inspection of the channel between this point and Butte City, high water head of navigation. There has been agitation for some years to dredge and clear the river between the two points, so river traffic can be resumed.

Historic Custom House May Be Sold

Sacramento.—Joseph Knowland, chairman of the State park commission, has urged the federal treasury to postpone the proposed sale of the historic Monterey customs house until the State is in a position to purchase it. The building marks the spot where in 1846 Commodore Sloat raised the American Flag and claimed California for the United States. Since 1900 the State has leased the customs house from the government and the legislature has appropriated money from time to time for its restoration. The treasury department recently announced plans to sell it.

Find Historic Plaque

San Francisco.—A brass plaque which Sir Francis Drake nailed to a "faire great oaken poste" when that buccaneer took possession of California (Nova Albion) for Queen Elizabeth in 1579, has been purchased by the California Historical Society from a man who found it imbedded in the soil, near San Rafael. The plaque, lost for 357 years, has this inscription: "Bee it knowne unto all men by these presents, Ivne 17 1579, by the grace of God and in the name of Herr Maiesty Qveen Elizabeth svccessors forever I take possession of this kingdome whose king and people freely resigne their right and title in the whole land vnto Herr Maiesties keepeing now named by me an to bee knowne vnto all men as Nova Albion. Francis Drake."

Police Seize Indecent Books

Sacramento.—Thirty-six men and women, the proprietors and clerks in drug and cigar stores, were booked at the city jail here on charges of selling indecent literature and "art" photographic magazines. Police seized more than 4000 copies of the tabooed publications from the various establishments where the arrests were made. The cleanup was ordered following complaints made by parents and school authorities relative to purchase of the magazines by juveniles.

On the Funny Side

Brief Remarks

A speaker, who had been asked to make his after-dinner remarks as brief as possible, rose and said:

"I have been asked to propose the toast of our guest and I have been told that the less said the better."

A writer muses on what the half-century-old Statue of Liberty would say if she could speak. She'd probably claim to be still in her twenties.—Rochester Times-Union.

The Shoe Fit

Solicitor—You pay a small deposit, then you make no more payments for six months.

Lady of the House—Who told you about us?

Difficult Bathing

Mrs. AAA—How do you like your new electric washer?

Mrs. TVA—Not so good. Every Saturday night when I get into the thing and start to take a bath those paddle arrangements knock me off my feet.

A woman's tears—"the greatest water power known to man."

Let That Be a Warning

An old Scots woman was wandering round the local museum with her grandson. When they came to the usual statue of Venus de Milo, with half an arm missing on one side and the whole arm cut away on the other. "There ye are, my lad," said the old grandmother, wagging her finger to the youngster. "That's what comes o' biting your finger nails."—Montreal Star.

A Base Possession

The wavering mind is but a base possession.—Euripides.

Constipated 30 Years

"For thirty years I had stubborn constipation. Sometimes I did not go for four or five days. I also had awful gas bloating, headaches and pains in the back. Adlerika helped right away. Now I eat sausage, bananas, pie, anything I want and never felt better. I sleep soundly all night and enjoy life." —Mrs. Mabel Schott.

If you are suffering from constipation, sleeplessness, sour stomach, and gas bloating, there is quick relief for you in Adlerika. Many report action in thirty minutes after taking just one dose. Adlerika gives complete action, cleaning your bowel tract where ordinary laxatives do not even reach.

Dr. H. L. Shoub, New York, reports "In addition to intestinal cleansing, Adlerika checks the growth of intestinal bacteria and colon bacilli."

Give your bowels a real cleansing with Adlerika and see how good you feel. Just one spoonful relieves GAS and stubborn constipation. At all Leading Druggists.

Division

Spilt water cannot be gathered up.—Chinese Proverb.

Women, Young or Older

Mrs. J. Snitger of 139 Prague St., San Francisco, Cal., said: "Following an illness I was weak. After taking a half bottle of Dr. Pierce's Favorite Prescription as a tonic I had a keen appetite and began to get relief and after taking four bottles I felt well and strong again. I surely hope all women suffering from functional irregularity will give 'Favorite Prescription' a trial." Buy now of your druggist. New size, tablets 50c.

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—*life itself*—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure.

When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use *Doan's Pills*. They have had more than forty years of public approval. Are endorsed the country over. Insist on *Doan's*. Sold at all drug stores.

DOAN'S PILLS

Scrap Iron for Europe's Arms Jams Freight Yards

Ports and freight yards of the United States are fast becoming jammed with freight cars loaded with scrap iron, owing to the lack of ships to carry the metal to European munition makers. This scene is typical of hundreds. Old railroad scrap, household utensils and other metal objects are being hurried abroad as fast as ships can take them.

A MORNING IN THE GARDEN

By DOUGLAS MALLOCH

A MORNING in the garden
Is just the nicest way
That there can be, it seems to me,
With which to start the day.
About the nicest party
That anyone can know
Is when the sun asks ev'ryone
A-gardening to go.

For ev'rything invites you,
The sun, the earth, the sky,
The little birds have their own words
That they invite you by.
The jonquils and the tulips
Are nodding with their heads,
And sprouts of green you hadn't seen
Are peeping from their beds.

So Mother takes her basket,
His bucket Brother brings,
And I, I take the hoe and rake
And all the other things.
Then, when our work is over,
It's nice to know all day
We've done our part with hand and heart
To make a garden gay!

Smart, Flattering Dresses

MRS. DICK EVANS has come to town and brought Ann and Eddie LeRoy with her. She lives in Palm Beach in the wintertime and, of course, knows all about style. That's why she wears this directoire type frock that is both new and figure flattering. In the floral print she has chosen she is perfectly gowned for the parties that will be given for her in the home town. The kiddies are wearing the simple styles appropriate to childhood and therein their smartness lies.

Auntie Rose Sews, Too.

Little Ann is asking Auntie Rose if she makes her clothes too. "Sure enough dear," comes the reply. "I made this percale for mornings and have a beauty in yellow crepe cut from the same pattern to wear to the Bid-or-Bi meetings."

"I'll bet you can sew fast, too, the way Mother does. It only took her two mornings to make Eddie's suit and my dress. Won't you help me with my doll clothes now?"

"Indeed I will, Ann, and then we will have some of those oatmeal cookies you like for lunch."

The Patterns.

Pattern 1272 is available in sizes 14 to 20 (32 to 42 bust). Size 16 requires 4⅜ yards of 39 inch material and 2½ yards of ribbon for tie belt.

Pattern 1275 is for sizes 6 months to 4 years. Size 1 requires 1½ yards of 32 inch material.

Patterns 1403 comes in sizes 2, 4, and 6 years. Size 4 requires 1½ yards of 36 inch material.

Pattern 1212 is designed in sizes 34 to 48. Size 36 requires 5 yards of 35 inch material plus ⅓ yard contrasting for the collar.

New Pattern Book

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents today for your copy.

Send your order to The Sewing Circle Pattern Dept., 149 New Montgomery Ave., San Francisco, Calif. Price of patterns, 15 cents (in coins) each.

BEDTIME STORY by Thornton W. Burgess

MRS. GROUSE LEARNS MANY THINGS

ALL the time that Peter Rabbit and her other friends were worrying about her, Mrs. Grouse was very warm and very comfortable in the henhouse of Farmer Brown's boy. That first night she had slept soundly, for you know she had been very, very tired. In the morning when she had opened her eyes she couldn't think at first where she was. Then she remembered how she had been picked up by Farmer

She Peeped Out of the Box Timidly and Looked Around.

Brown's boy when she was too weak to fly and put in the box of hay, where she now was, and given all she could eat.

She peeped out of the box timidly and looked around. It was a strange place, a very strange place, to Mrs. Grouse. You see, never before in all her life had she slept under any roof excepting the thick, low hanging branches of a hemlock tree. Always she had been where she could spread her stout wings and whirr up and away when she pleased. But here she couldn't fly, because there were walls on all sides and a roof and no place to fly to. The very thought made her heart sink and frightened her. Along one side were rows of boxes with hay in them. In some of these were birds, who looked as if they might be relatives of hers, ony they were ever so much bigger than she. And sitting on long sticks across one end were more of these birds.

Mrs. Grouse kept very still. None of these strange birds had noticed her and she didn't want them to. Little by little as she looked and listened she remembered things she had heard Unc' Billy Possum tell about Farmer Brown's henhouse. You know, Unc' Billy knows all about the inside of that henhouse. Somehow the things she was looking at were very like the things she had heard Unc' Billy tell about.

"Why!" she exclaimed, "I believe this is the very place!"

By and by she heard footsteps and she knew them for the footsteps of Farmer Brown's boy. All her old fear of him returned and she crouched down in her box all of a tremble. The door opened just wide enough for Farmer Brown's boy to squeeze through. You see, he was afraid that if he opened it wide Mrs. Grouse might get past him and fly away. So he squeezed through as narrow a space as he could and shut the door after him. He smiled down at Mrs. Grouse.

"How do you do this morning, Mrs. Grouse," said he, and his voice was low and very pleasant. "I suspect that you are anxious to get back to the Green Forest, but I am not going to let you—not yet, anyway. You see, that crust over the snow is just as hard and icy as ever and I am afraid that if I should let you go now you would have hard work to find enough to eat. You might starve to death. You are a great deal better off right here, even if you don't think so."

He got a piece of wire netting and fastened it over the box. Then he left some nice corn and barley for her and went away. Mrs. Grouse felt worse than ever. You see, now she couldn't even get out of her box. She felt that she was a prisoner, very much a prisoner, and such a feeling is dreadful. For a long time she couldn't even eat. But by and by she grew so hungry that she just had to eat. After that she felt better. A full stomach aways makes one feel better. Pretty soon Mrs. Featherlegs discovered her and called all the other hens. They crowded around the box and made unkind remarks about Mrs. Grouse.

They asked her what business she had there, and made fun of her because she was so much smaller than they. And then Mrs. Grouse was very glad, indeed, of that wire netting which a little while before had seemed so hateful. When they finally left her alone she grew very thoughtful. She had learned many things—what the inside of Farmer Brown's henhouse was like, that Farmer Brown's boy could be very gentle, that even a hateful wire might prove a blessing, and much more.

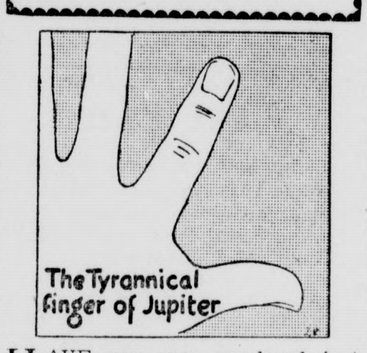
THE LANGUAGE OF YOUR HAND

By Leicester K. Davis

© Public Ledger, Inc.



HAVE you ever wondered just how purposeful this or that man or woman of your acquaintance might be—and how his or her purposes are expressed? The Finger of Jupiter will go far toward answering this interesting question with accuracy.

Forefingers vary, but not so greatly as one might think. Compare a hundred of them, and you will find that they fall within a comparatively small group of major classifications. Here is one that you will meet on hands where sometimes you would expect its indications least.

The Tyrannical Finger of Jupiter.

While most often found on the thickset primal type of hand, the tyrannical forefinger is not confined to any one kind of hand. In fact it is found on many a hand to which it hardly seems to belong. Its outstanding characteristics are easily recognized. These are: (1) Shortness, (2) thickness, (3) straightness.

The knuckles of this type are full, though so well covered that their size is deceiving. The underside of the finger is usually heavily fleshed, so much so that when partly closed the finger has a pouched appearance. The nail tip is broad and well rounded. With the finger extended there is wider than average space between the forefinger and second finger.

With a finger of this type you may look for a personality that has difficulty in overcoming selfishness, and one, most certainly, that finds its greatest satisfaction in putting through activities from which self-gratification seems assured.

Dyeing Pickpockets

In certain provinces of Rumania a person convicted of picking pockets has his hands and ears painted with a special blue dye which lasts for four weeks. At the end of that time he has to return to the police station for a fresh coat of paint, and so on for a whole year. When a year has passed, if he has committed no further offense, he gets a clean sheet. It is said that thieves so treated nearly always reform.—London Answers.

First Aid to the Ailing House

—By— Roger B. Whitman

PROPER DRAFT IN A CHIMNEY

FROM what I have seen of household heating plants and chimneys, I conclude that a great many complaints of insufficient heating are due to the poor condition of the heaters, and especially of the chimneys. With coal as a fuel, the briskness of the fire depends on good draft in the chimney, which is created by the rising of heated air in the chimney flue, and a continual supply of air at the bottom of the chimney in comparison with the air outside, the stronger will be the draft. By the construction of a chimney and a heater, the passage of the draft through the firebed supplies air that is necessary for combustion.

A heater is made with dampers by which the draft can be guided through the firebed when heat is needed, and at other times is passed into the chimney without going through the fire. For good operation, these should be the only points through which air can be drawn by chimney draft. When air can leak in anywhere else, the draft will be cut down, just as a flow of water from a garden hose will be cut down by a leaky connection.

There may be many places at which air can leak in. One very common place is around the connection of the smoke pipe to the chimney. Others are at defective mortar joints in the masonry of the chimney. The masonry should be tight, not only for a good draft, but because openings are common causes of fire.

To test the tightness of a chimney, a small and smoky fire is built; a fire of tar paper, for example. When smoke is coming out in good volume, a board is placed over the chimney top. No longer able to escape at the top, the smoke will find its way out of any openings that may be present elsewhere. These openings should be located, and the mortar removed.

Another test can be made with a lighted candle; the flame, when held close to leaks, will be sucked in. This test should be made around the chimney. Another usual air leak is around the clean-out door at the bottom of a chimney. An open joint around the door can be closed with asbestos cement.

A very common cause of poor draft is the connection of two fires to one flue. Each fire will kill the draft of the other. Every fire should have its own flue.

OUT OF THE ASHES

A city asleep, just before dawn, on the morning of April 18, 1906. It seems no different from any other morning. But it is destined to be one long remembered in California.

Just before dawn, and then . . . Suddenly the earth lurches. There is a jarring polt that all but flings people from their beds. For many seconds the rocking motion continues, shaking down buildings, splitting the streets. Then all is quiet. And then the bedlam of a populace terror-stricken by catastrophe.

This week, thirty-one years later, old timers are telling stories about the San Francisco earthquake, about the fire that followed, about the refugees with their tents in the parks, about the anxious hours the nation spent waiting for full reports of the disaster.

But that is not all they tell. They tell, too, about a city rising again out of the ashes of destruction, about the pluck and vigor of a people setting out to rebuild their lost homes and lost fortunes.

So quickly did the city rise out of embers scarcely yet cold, that the world was astonished. The rest of the nation, having thought fear of new earthquakes would cause people to leave the state, was getting one of its early lessons about the courage and spirit of these far westerners.

It was the spirit that has since built present-day California, and is building now for a greater California of the future.

THE PRESS AND THE SCHOOL

Democracy steers a perilous course these days through turbulent seas where on all sides loom the jagged rocks of various "isms." And at the helm, in America, are two forces principally responsible for keeping the rudder true.

The two forces are the press and the school.

Such, at least, was the belief expressed to interviewers by one of the leading delegates to the confernce of more than 700 educators from all parts of California who gathered in San Francisco last week.

"No one can predict where the currents will take us," he said. "But the two greatest forces with the power to keep those currents within the bounds of democracy are the press and the school.

"The function of one is to educate the child. The function of the other is to enlighten the adult. And only through education and enlightenment can the people possess the knowledge, understanding and responsibility to carry the cause of democracy in an ever more complex life."

The teachers and principals and superintendents are alive to their part in shaping the nation's future. Nor is the press, by and large, unmindful of its responsibilities.

May the press and the school work with ever increasing determination to be worthy of their trust as the preservers of democracy.

POINT SAN PEDRO ROCKAWAY BEACH

More work last Sunday on the part of the caterpillar tractor at the dizzy heights of the hill at Pedro has made the majestic mountain appear strange in its familiar surrounding scenery. The two great outdoor sports thereabout are goggling at the risks taken by the "cat man" in scaling places that look as steep as a wall and gardening, which engages local people almost all of every day including Sunday.

* * *

A good crop of volunteer potatoes planted itself just above the Rockaway water works, a remnant of a last year potato patch. But before anyone in Rockaway could dig them out, someone (presumably a transient) hove in and dug every one of the potatoes.

* * *

With the warm spring days the horseback riding parties begin, and one sees saddle pals ambling along the winding trails. The fine buckskin mare owned by Harry Rees caught her hoof in something sharp and hurt it so badly that a veterinary had to be called. Harry Rees is the only roadhouse anywhere from San Francisco to Los Angeles that does business in an upstairs bar, pays all its licenses and makes a profitable showing without a sign outside or any overt invitation to the motorist. To all intents and purposes it's almost like doing roadhouse business in a private home—and meeting all the requirements besides.

* * *

Mrs. Becky Johnson has had her garden wall moved inward and cemented stone steps built all the way up to the porch. She is planning a trip to Carmel in the near future.

* * *

Rough sea continues to hold up the seasonal fishing off shore. Jim Stuart and Forrest Cubbon report a number of boat parties out but few big catches.

* * *

Marilyn, Russell and Bob Lewis, with their friend Sonia, went riding last Sunday and reported a very enjoyable jaunt in the hills.

* * *

The Hector Martins have returned to their Pedro home after a prolonged stay in San Francisco while Hector was taking a special course of artstic carpentering and draftsmanship.

Guest Queens Are Invited To Fiesta

Two Oregon queens, a princess and an Alaskan beauty were invited this week to attend and participate with California queens in the Golden Gate Bridge Fiesta in San Francisco, May 27 to June 2, to celebrate the opening of the greatest suspension bridge in the world.

Those invited were the queen of the Portland Rose Festival next June, cave queen and princess of Grants Pass and Miss Marguerite Lee of Nome, recently chosen as the "Miss America" of Alaska.

DANCING

Free dancing parties are now entertained every evening at Jack Bratton's tavern. Ray Hollingum plays the trap drums to the music of phonograph records. On Saturday and Sunday evenings he is accompanied by an accordionist.

Washington Woman Freed on Husband Slaying Charge

Acquitted because she was "mentally incompetent" at the time she shot and killed her husband, Harry Fain, 43, at Index, Wash., Mrs. Mabel Fain is pictured as she was embraced by Rex Walton, her daughter's fiance. To Mrs. Fain's right is her daughter, Thomasine Slaughter. Fain was accused of having been intimate with Mrs. Charlotte Oxford of Snohomish, Wash., who, police said, claimed Fain was the father of her unborn child. The trial was held in Everett. Mrs. Oxford was permitted to live in the Fain home, Mrs. Fain told the authorities.

SKY BLAZING

Surveying a new aerial trade route between the United States and Australia, the Pan American clipper arrived at Auckland, N. Z., Tuesday of this week.

It completed the 1850 mile flight from Pago Pago, Samoa, in 11 hours, 42 minutes, against a head wind.

FIESTA MARATHON

Stout hearted runners are training to get into the 20 mile marathon race from San Rafael across the Golden Gate to San Francisco, a feature of the Golden Gate Bridge Fiesta of May 27 to June 2. The runners, five to each team, will run in relays of four miles each.

A rattlesnake-gila monster ba tle for desert supremacy was scheduled at Cooledge, Ariz., for Rodeo Day, to be held Sunday of next week. A $25 fund was posted to buy the gladiators.

Three Act Play At S. M. Jaysee

San Mateo Junior College students present their term play this evening at the college. "And So To Bed," a three act comedy of life in London in the seventeenth century, is based on the famous diary of Samuel Pepys, each entry ending with "and so to bed."

Today and tomorrow the college will entertain coed delegates from all the junior colleges of Northern California at an annual convention.

Tomorrow the junior college track team will face Fresno State College at Fresno and the baseball team will play two conference games at Santa Rosa Jaysee.

Plans Are Studied To Finance Fair

A plan for raising $7,500,000 to finance the Golden Gate International Exposition, devised by a committee of which six prominent San Mateo County residents are members, attracted nation wide attention this week.

The method of dividing San Francisco business, commercial, financial, industrial and professional life into 21 major classifications which are broken down into 240 groups, each with a co-chairman, is being studied by other cities as the best method yet devised for raising funds for civic projects.

Members of this committee include Samuel Kahn of Hillsborough, A. P. Giannini of San Mateo, Herbert Fleishhacker and Roger D. Lapham of Woodside, and J. B. Levison of Atherton. Leland Cutler of Woodside, president of the exposition, is an ex-officio member.

IT PAYS for itself — Then PAYS YOU!

ALCAZAR SHOW SWINGS IN WITH 'SWING PARADE'

Two Big Hits To Be Produced—Marionettes At Columbia

The San Francisco Federal Theater Project finds itself the possessor of two hits, two runs and no errors this week with two major openings in down town theaters.

"Swing Parade," a musical show so lavishly set as to approach extravaganza proportions with new music, twenty scenes, a beauty ensemble, lots of comedy, directed by Max Dill, opening Thursday night at the Alcazar, and "The Emperor Jones" by Eugene O'Neill, one of America's foremost playwrights, presented at the Columbia with Ralph Chesse's marionettes and Mr. Chesse himself interpreting the title role, make up the huge program of the moment.

Both productions represent the highest point of attainment of the Theater Project since its organization more than a year ago. "Swing Parade" is the work of many months by nearly a hundred actors, theater technicians and the well known director and his assistants.

"The Emperor Jones" is seen with an entirely new setting of figures and scenery constructed especially for the current showing. It is the first time the play has been presented in a major legitimate theater in the West.

Both productions have had the benefit of a heavy advance sale. It will be the last time the marionettes will be seen in a local theater under Federal Theater auspices. With the closing on April 24 of "The Emperor Jones," repertoire of plays will be booked for road showing.

Husky Crew Prepares For Annual U. C. Race

Favored to win in the annual University of Washington-University of California crew race, the Washington "Huskies" are pictured as they rigged and prepared their shells for a workout shortly after they arrived in Oakland, Cal. The race will be held in the Oakland Estuary over a three mile course April 17. The California "Bears" sophomore boat is considered faster this season than it has been for some time. The "Huskies" took 25 huge cans of drinking water with them to the California campus.

Bayshore Fire Chief Cautions About Fire

(Editor's Note—This is the first of a series of articles on fire, its prevention and control, prepared by Fire Chief Boehme of Bayshore City.)

Householders were urged by Fire Chief Boehme this week to use great care in burning papers and trash in their yards, because of the high winds common at this time of the year. The chief said that he sympathized with everyone's desire to keep his yard and premises neat and clean but at the same time pointed out that fires, if not carefully watched, may blow around and the burning fragments communicate the fire to nearby property or buildings.

"The best method, if it is absolutely necessary to burn material out of doors, is to make the fire in a wire basket or some other container that will keep the blaze from being scattered by spring breezes," he said.

"We should also be careful that the fire is not made in or near dead grass, leaves and brush left over from last summer. These materials dry out quickly in this season of warm weather and brisk winds. When dry they will burn briskly, allowing fire to travel very fast."

Chief Boehme also emphasized the desirability of having a grownup watch the fire until it is entirely out. If this isn't done it may get away, or little children may play around the bonfire. There have been numerous instances of kiddies being burned when they did this, for they often make a game of seeing who can come closest, or take turns in jumping over the flames.

Parents Assembly To Hold Luncheon

The Visitacion Center Parents Assembly will hold a regular monthly luncheon meeting, Wednesday of next week at 12:15, at the Visitacion Valley Community Center, an agency of the San Francisco Community Chest, 66 Raymond avenue.

A delightful program has been planned with Judge Twain Michelson as guest speaker. He will address the parents on "The Public Schools and the Community." Mr. Whitman will present a colored moving picture of early California history entitled "Twenty-four Minutes in El Dorado."

The luncheon will be followed by a whist party. Mrs. E. Eisenhut will be chairman of the luncheon and Mrs. A. Williams will be chairman of the whist.

Reservations for luncheon must be received no later than Tuesday of next week.

Bonvitas Club Will Hold Social Dance

The Bonvitas Club, organized for social and athletic purposes, announces a social dance to be held Saturday evening of next week at 111 Raymond avenue. On May 1 another dance will be held. Ernie Gatto and his music will play for the affairs.

The basketball and handball courts are open every evening. Membership has reached the 120 mark and charter applications to join the club are still being accepted.

CMTC Training Camp To Start July 1

The Citizens Military Training Camp at the Presidio of Monterey will be held this summer, July 1 to 30, under the command of Colonel Troup Miller, Eleventh Cavalry.

Training will be offered in the basic, red, white and blue courses of the infantry, cavalry and field artillery branches. Approved blue course graduates are eligible for second lieutenant commission in the reserve, however a trainee at CMTC is not obligated for future service to the army by reason of such training. The camp athletic program this year is to be one of the best, under competent directors.

Army personnel supervising the training this year will be regular army officers from the Thirtieth Infantry, Eleventh Cavalry and Seventy-sixth Field Artillery and officers from the Three Hundred and Sixty-fourth Infantry, a Los Angeles reserve regiment commanded by Colonel Dwight M. Green of that city.

Young men of good character interested in attending CMTC this summer are urged to contact the county representative for CMTC, F. A. Bloom, City Hall, Park Road, Burlingame, Calif., for further information and qualifications without delay, as a policy of first come, first served, is in effect with regard to enrollment.

Public School Week Observance At Hi

Jefferson Union High School will observe Public Schools Week by presenting a special program at the high school auditorium, Tuesday evening, April 27. Kenneth McLean will be chairman of the affair.

The program will include selections by the school orchestra under the direction of Thomas Stevens, a short address by Kenneth McLean, "O Gladsome Light," and "Negro Spiritual" by the high school. A Capella Choir under the direction of Thomas Stevens, a play by the dramatics class directed by W. E. Hoppe, an address by Assemblyman Harrison Call and "Commit Thy Ways" and "Mercy On Us, O Lord," by the A Capella Choir. A pledge of allegiance to the flag will conclude the program.

Principal James Ferguson has assisted in arranging Jefferson Union High School participation in Public Schools Week celebration and the public is invited to attend the Tuesday evening program.

BAYSHORE NEWS

A food sale for the benefit of the P. T. A. will be held in Riley Hall, Wednesday of next week, starting at 10:30 a. m. Mrs. Sue Byrnes is in charge of the sale. Special feature of the event will be home made enchilades.

* * *

Mrs. Dufford, Mrs. Byrnes, Mrs. Wilcox, Mrs. Jessie Ford, Mrs. Mardecich, Mrs. Pasini and Mrs. Franzen attended the Seventeenth District convention held in San Mateo Thursday and Friday of this week.

* * *

The Bayshore Protective Association held a whist party in Riley Hall last evening.

* * *

The Bayshore Fire Department will hold a dance in the Voters' League Hall on May 16. The committee, headed by Arley King, promises a good time to all those who attend the affair. Mel Lyons and his popular band will furnish music.

* * *

The abandoned well on Schwerin street will be filled and covered by the Bayshore Fire District, it was announced this week.

* * *

The Longwells family have moved to their new home on Acacia street. Al Hughes, proprietor of the Geneva Club, will move into the house vacated by the Longwells. Both families have purchased their homes.

* * *

Mrs. Lon Boehme Jr. and Jay and Betty Boehme have gone to Galt, Calif., for an indefinite visit with the father of Mrs. Boehme, who is quite ill.

Public Schools Program At High

Jefferson Union High School P. T. A. will sponsor a special program, Wednesday afternoon of next week, in the little theater at the school. Public Schools Week features will be presented.

James Ferguson, principal, will lead a panel discussion in which activities of the school wll be presented by the following instructors: R. L. Gray, science department; Miss Juanita Young, physical education; Clive M. Saiz, history department; William Hoppe, English; C. M. Hackley, auto mechanics; Hugh Pattersen, vocational guidance; D. Moseley, industrial arts; Miss E. Potter, art, and Miss Marjorie Robinson, commercial department.

There will be a brief period during which parents may ask questions concerning any phase of the school curriculum.

Five Juniors Taken Into Fern Camp

Fern Leaf Camp, Woodmen of the World, announced this week the acceptance of five new junior members. Three new applications have also been filed for adult membership.

Wednesday of next week a big birthday party will be tendered to all members who were born during the months of January, February, March or April. The camp will sponsor a whist party Wednesday evening, April 28, at its hall, 17 Raymond avenue.

REMODELED PARLOR

Billie's Barber Shop and Beauty Parlor, 33½ Leland avenue, Visitacion Valley, has recently been remodeled and entirely new modern equipment has been installed.

Trudie Burch, graduate of the Premier Beauty School of San Francisco and who has had several years of practical experience, has been engaged as operator for the new salon.

BUYS TWICE

After collecting insurance on a radio stolen from his automobile Ray J. Woods of Kansas City went shopping. He bought a second-hand radio, had it delivered to a garage for installation in his car and discovered he had bought his own radio back. Jack Gray, pawnshop manager, and his Negro handyman were arrested.

Installation Held By Bayshore P. T .A.

Bayshore P. T. A. unit held its annual installation of officers at a regular meeting in the Riley Hall, Friday evening of last week, with President Ruth Dufford officiating.

Long banquet tables were brightly decorated in the school colors of blue and gold. A bouquet of spring flowers was the center piece. Speaker of the evening and installing district officer, Mrs. B. D. Ralston, reviewed the theme of the year and its highlights.

Musical selections were offered by Has Minihan and his trio, Bill Kelley, Lawrence Lewis and Tom Monahan. Accompanied by Mrs. Casero, Ruth Hoet entertained with a tap dancing number.

After the installation, Mrs. Dufford presented the gavel to the new president, Mrs. Sue Byrnes, and wished her much success. The unit presented Mrs. Dufford with pieces of silverware and a president pin in appreciation of her work.

New Fruit Market Opens In Valley

Jack Skoules opened a new fruit market at 2632 Bayshore boulevard in Visitacion Valley early this week.

The new proprietor buys his produce directly from Southern California orchards. He handles oranges, lemons, grapefruit, apples and bananas.

CELEBRATION OF PUBLIC SCHOOL WEEK IN APRIL

Program Slogan Is "Cross The Bridge From Home To School"

"Cross the bridge from home to school, Public Schools Week, April 26 to 30." With this as its official slogan, preparations for the eighteenth annual observance were underway this week under the direction of General Chairman James Leo Halley.

The slogan was selected by a committee of judges from hundreds submitted by school children in a contest sponsored by the Public Schools Week committee. It was authored by eleven year old Ralph Grano of John Muir School.

Programs, open house events and classroom demonstrations will be held in practically every school during the celebration.

Parent Teacher Associations, veteran organizations, fraternal and service clubs are participating in Public Schools Week.

SEX CHANGE

Sophia Smetkowna, 23 year old woman javelin champion of Poland, was quoted by newspaper men this week as saying she intended to undergo an operation to chance her sex.

Eager to Oblige

He examined the menu carefully, and then tossed it irritably on the table.

"Waiter," he called, "is this all you have today?"

"Yes, sir," said the waiter, whose term of service expired at the end of the week.

"Why, there's nothing on the menu fit to eat—absolutely nothing!" roared the diner. "Bring me the manager!"

"Very good, sir," eagerly piped the waiter. "How would you like him—grilled or fried?"

A Delicate Competition

"Didn't Crimson Gulch take up the idea, just for novelty, of offering a prize for the toughest-looking man?"

"Yes," answered Cactus Joe. "But the enterprise fell through. There wasn't anybody who would have had nerve enough to face men who was maybe jest lookin' for trouble and formally announce to one of them that he had won the prize."

WNU Service

CHAPTER IX—Continued
—14—

Vance rose and bowed.

"Thanks for your ultimate candor, Miss Graem. I'm deuced sorry I had to torture you to obtain it. And please ignore the nightmares you accused me of manufacturing. I'm really grateful to you for helping me fill in the pattern."

The girl frowned as her intense gaze rested on Vance.

"I wonder if you don't really know more about this affair than you pretend."

"My dear Miss Graem! I do not pretend to know anything about it." Vance went to the door and held it open for her. "You may go now, but we shall probably want to see you again tomorrow, and I just ask for your promise that you will stay at home where you will be available."

"Don't worry, I'll be at home."

As she went out, Miss Beeton was coming up the passageway toward the study. The two women passed each other without speaking.

"I'm sorry to trouble you, Mr. Vance," the nurse apologized, "but Doctor Siefert has just arrived and asked me to inform you that he wished very much to see you as soon as possible. Mr. Garden," she added, "has told him about Mr. Swift's death."

At the moment her gaze fell on the tweed coat, and a slight puzzled frown lined her forehead. Before she could speak Vance said:

"The sergeant brought your coat up here. He didn't know whose it was. We were looking for something." Then he added quickly: "Please tell Doctor Siefert that I will be very glad to see him at once. And ask him if he will be good enough to come here to the study."

Miss Beeton nodded and went out.

CHAPTER X

There was a soft knock, and Vance turned from the window. He was confronted by Garden, who had opened the study door without waiting for a summons.

"Sorry, Vance," Garden apologized, "but Doc Siefert is downstairs and says he'd like to see you, if convenient, before he goes."

Vance looked at the man a moment and frowned.

"Miss Beeton informed me of the fact a few minutes ago. I asked her to tell the doctor I would be glad to see him at once. 'I can't understand his sending you also. Didn't the nurse give him the message?"

"I'm afrad not. I know Siefert sent Miss Beeton up here, and I assumed, as I imagine Siefert did, that you had detained her." He looked round the room with a puzzled expression. "The fact is, I thought she was still up here."

"You mean she hasn't returned downstairs?" Vance asked.

"No, she hasn't come down yet."

Vance took a step forward.

"Are you sure of that, Garden?"

"Yes, very sure." Garden nodded vigorously. "I've been in the front hall, near the foot of the stairs, ever since Doc Siefert arrived."

"Did you see any of the others come down?"

"Why, yes," Garden told him. "Kroon came down and went out. And then Madge Weatherby. And shortly after the nurse had gone up with Siefert's message to you, Zala came down and hurried away. But that's all. And, as I say, I've been down there in the front hall all the time."

"What about Hammle?"

"Hammle? No, I haven't seen anything of him. I thought he was still here with you."

"That's deuced queer." Vance moved slowly to a chair and sat down with a perplexed frown. "It's possible you missed him. However, it doesn't matter. Ask the doctor to come up, will you?"

When Garden had left us Vance sat smoking and staring at the ceiling. I knew from the droop of his eyelids that he was disturbed.

"Deuced queer," he muttered again.

"For Heaven's sake, Vance," Markham commented irritably. "It's entirely possible Garden wasn't watching the stairs as closely as he imagines."

"Yes. Oh, yes." Vance nodded vaguely. "Everyone worried. None on the alert. Normal mechanisms not functioning. Still, the stairs are visible half way up the hall, and the hall itself isn't very spacious . . ."

"It's quite possible Hammle went down the main stairs from the terrace, wishing, perhaps, to avoid the others."

"He hadn't his hat up here with him," Vance returned without looking up. "He would have had to enter the front hall and pass Garden to get it. No point in such silly maneuvers . . . But it isn't Hammle I'm thinking of. It's Miss Beeton. I don't like it . . ." He got up slowly and took out another cigarette. "She's not the kind of girl that would neglect taking my message to Siefert immediately, unless for a very good reason."

"A number of things might have happened—"

"Yes, of course. That's just it. Too many things have happened here today already." Vance went to the north window and looked out into the garden. Then he returned to the center of the room and stood for a moment in tense meditation. "As you say, Markham." His voice was barely audible. "Something may have happened. . . ." Suddenly he threw his cigarette into an ash tray and turned on his heel. "Oh, my word! I wonder. . .Come, Sergeant. We'll have to make a search—immediately."

He opened the door quickly and started down the hall. We followed him with vague apprehension, not knowing what was on his mind and with no anticipation of what was to follow. Vance peered out through the garden door. Then he turned back, shaking his head.

"No, it couldn't have been there. We would have been able to see." His eyes moved inquiringly up and down the hall, and after a moment a strange, startled look came into them. "It could be!" he exclaimed. "Oh, my aunt! Damnable things are happening here. Wait a second."

He rapidly retraced his steps to the vault door. Grasping the knob, he rattled it violently; but the door was now locked. Taking the key from its nail, he inserted it hurriedly into the lock. As he opened the heavy door a crack, a pungent, penetrating odor assailed my nostrils. Vance quickly drew back.

"Out into the air!" he called over his shoulder, in our direction. "All of you!"

Instinctively we made for the door to the garden.

Vance held one hand over his nose and mouth and pushed the vault door further inward. Heavy amber-colored fumes drifted out into the

It Was Part of a Broken Vial.

hall, and I felt a stifling, choking sensation. Vance staggered back a step, but kept his hand on the doorknob.

"Miss Beeton! Miss Beeton!" he called. There was no response and I saw Vance put his head down and move forward into the dense fumes that were emanating from the open door. He sank to his knees on the threshold and leaned forward into the vault. The next moment he had straightened up and was dragging the limp body of the nurse out into the passageway.

As soon as the girl was out of the vault, Vance took her up in his arms and carried her unsteadily out into the garden, where he placed her gently on the wicker settee. His face was deathly pale; his eyes were watering; and he had difficulty with his breathing. When he had released the girl, he leaned heavily against one of the iron posts which supported the awning. He opened his mouth wide and sucked the fresh air into his lungs.

The nurse was gasping stertorously and clutching her throat. Although her breast was rising and falling convulsively, her whole body was limp and lifeless.

At that moment Doctor Siefert stepped through the garden door, a look of amazement on his face. He had all the outward appearance of the type of medical man Vance had described to us the night before. He was about sixty, conservatively but modishly attired, and with a bearing studiously dignified and self-sufficient.

With a great effort Vance drew himself erect.

"Hurry, doctor," he called. "It's bromin gas."

Siefert came rapidly forward, moved the girl's body into a more comfortable position and opened the collar of her uniform.

"Nothing but the air can help her," he said, as he moved one end of the settee around so that it faced the cool breeze from the river. "How are you feeling, Vance?"

Vance was dabbing his eyes with a handkerchief. He blinked once or twice and smiled faintly.

"I'm quite all right." He went to the settee and looked down at the girl for a moment. "A close call," he murmured.

Siefert inclined his head gravely.

At this moment Hammle came strutting up briskly from a remote corner of the garden.

"Good God!" he exclaimed. "What's the matter?"

Vance turned to the man in angry surprise.

"Well, well," he greeted him. "The roll call is complete. I'll tell you later what's the matter. Or perhaps you will be able to tell me. Wait over there." And he jerked his head in the direction of a chair nearby.

"I wish I'd taken the earlier train to Long Island," Hammle muttered.

"It might have been better, don't y'know," murmured Vance, turning away from him.

The nurse's strangled coughing had abated somewhat. Her breathing was deeper and more regular, and the gasping had partly subsided. Before long she struggled to sit up. Siefert helped her.

"Breathe as deeply and rapidly as you can," he said. "It's air you need."

The girl made an effort to follow instructions, one hand braced against the back of the settee, and the other resting on Vance's arm.

A few minutes later she was able to speak, but with considerable difficulty.

"I feel—better now. Except for the burning — in my nose and throat."

"What happened?" she asked.

"We don't know yet." Vance returned her gaze with obvious distress. "We only know that you were poisoned with bromin gas in the vault where Swift was shot. We were hoping that you could tell us about it yourself."

She shook her head vaguely, and there was a dazed look in her eyes.

"I'm afraid I can't tell you very much. It all happened so unexpectedly—so suddenly. All I know is that when I went to tell Doctor Siefert he might come upstairs, I was struck on the head from behind, just as I passed the garden door. The blow didn't render me entirely unconscious, but it stunned me so that I was unaware of anything or anybody around me. Then I felt myself being caught from behind, turned about, and forced back up the passageway and into the vault. I have a faint recollection of the door being shut upon me, although I wasn't sufficiently rational to protest or even to realize what had happened. But I was conscious of the fact that inside the vault there was a frightful suffocating smell."

"Yes. Not a pleasant experience. But it could have been much worse." Vance spoke in a low voice and smiled gravely down at the girl. "There's a bad bruise on the back of your head. That too might have been worse, but the starched band of your cap probably saved you from more serious injury."

The girl had got to her feet and stood swaying a little as she steadied herself against Vance.

"I really feel all right now." She looked at Vance wistfully. "And I have you to thank—haven't I?"

Siefert spoke gruffly. "A few more minutes of that bromin gas would have proved fatal. Whoever found you and got you out here did so just in time."

The girl had not taken her eyes from Vance.

"How did you happen to find me so soon?" she asked him.

"Belated reasoning," he answered. "I should have found you several minutes before the moment I learned that you had not returned downstairs. But at first it was difficult to realize that anything serious could have happened to you."

"I can't understand it even now," the girl said with a bewildered air.

"Neither can I — entirely," returned Vance. "But perhaps I can learn something more."

Going quickly to a pitcher of water Heath had brought, he dipped his handkerchief into it. Pressing the handkerchief against his face, he disappeared into the passageway. A minute or so later he returned. In his hand he held a jagged piece of thin curved glass, about three inches long.

It was part of a broken vial, and still clinging to it was a small paper label on which was printed the symbol "Br."

"I found this on the tiled floor, in the far corner of the vault. It was just beneath one of the racks which holds Professor Garden's assortment of chemicals. There's an empty space in the rack, but this vial of bromin couldn't have fallen to the floor accidentally. It could only have been taken out deliberately and broken at the right moment." He handed the fragment of glass to Heath.

"Take this, Sergeant, and have it gone over carefully for fingerprints. But if, as I suspect, the same person that killed Swift handled it, I doubt if there will be any telltale marks on it. However . . ."

"This was a dastardly thing, Vance," Siefert burst out, his eyes flashing.

"Yes. All of that, doctor. So was Swift's murder . . . How are you feeling now, Miss Beeton?"

"A little shaky," she answered with a weak smile. "But nothing more." She was leaning against one end of the settee.

"Then we'll carry on, what?"

"Of course," she returned in a low voice.

Floyd Garden stepped out from the hallway at this moment. He coughed.

"What's this beastly odor in the hall?" he asked. "It's gotten downstairs. Is anything wrong?"

(TO BE CONTINUED)

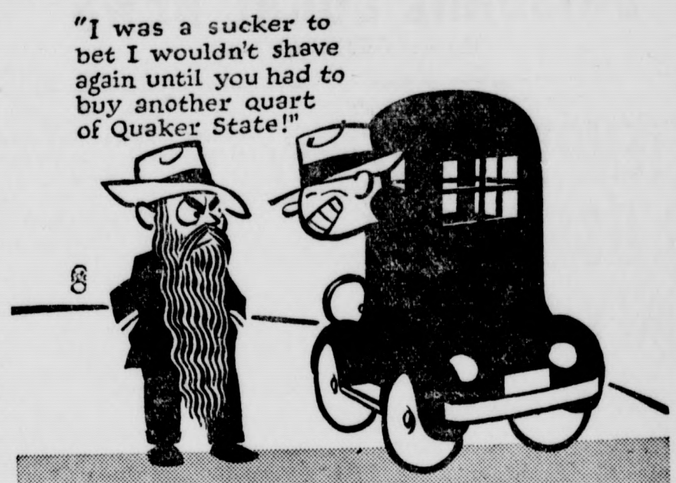
Builders for Ever

WHEN we build let us think that we build for ever. Let it be not for present delight nor for present use alone; let it be such work as our descendants will thank us for, and let us think, as we lay stone on stone, that a time is to come when those stones will be held sacred, because our hands have touched them, and that men will say as they look upon the labor and wrought substance of them, 'See! this our fathers did for us."—Ruskin.

Compliments are reciprocal.

He Who Will

Why should we call ourselves men, unless it be to succeed in everything, everywhere? Say of nothing, "This is beneath me," nor feel that anything is beyond your powers. Nothing is impossible to the man who can will.



GO FARTHER
BEFORE YOU NEED A QUART

Try the "First Quart" test. Drain and refill with Quaker State. See how far you go before you have to add the first quart. That's because there's an *"extra quart of lubrication in every gallon."* And remember . . . the oil that stands up longest is giving your motor the safest lubrication. Why Firestone
GROUND GRIP TIRES
GIVE MORE TRACTION

The patented two extra layers of Gum-Dipped cords hold the heavy tread to Gum-Dipped cord body
The body of patented Gum-Dipped High Stretch Cords which give greater adhesion, flexibility and strength to withstand pulls and strains
Firestone

THE patented scientific arrangement and spacing of the deep, rugged bars of the tread make this tire self-cleaning. It will not clog or ball up, thus providing clean traction with every turn of the wheel. The deep rugged tread is held inseparably to the cord body because every cotton fiber in every cord has been soaked in pure liquid rubber by the Firestone Patented Process of Gum-Dipping. This gives the tire much greater strength to resist the strains of the extra "pull."

Ground Grip Tires save 25 per cent in time and 25 per cent in fuel. They give more traction and drawbar pull — ride easier and cut down repair bills. You can save time and money by equipping your tractors, trucks and farm implements with Ground Grip Tires. See your Implement Dealer, Firestone Tire Dealer or Firestone Auto Supply and Service Store today.

ATTEMPT MADE TO USE UTILITY MONEY ON ROAD

Rock And Oil Made Available To Macadamize 3000 More Feet Of Streets

(Continued from page 1)

have legislation effected in order that the request of the petition might be carried out.

PRESENT STATE

At present San Bruno avenue, El Dorado street and San Benito road have been macadamized. Lake, Sierra Point, Santa Clara, Alvarado, Mono, Klamath, Mendocino, Monterey, Mariposa and San Francisco streets have been graded and spread with rock.

County Engineer Marshall announced this week that new allotment of 122 tons of rock and 7000 gallons of oil had been made to continue the road work. This material will complete approximately 3000 more lineal feet. If the public utility funds can be used to buy material, completion of the Brisbane project is assured.

THANK YOU VOTE

For their excellent work the street committee was given a vote of thanks by those present. Chairman of the mass meeting, Larry Southwick, and the committee were requested by motion to continue their work.

Refreshments were donated by Southwick.

BRISBANE GENERALITIES

By Phil Sbriglia

The hillsides of Brisbane are dressed in a fine array of fresh green grass and spring flowers. The picture, complete with golden poppies, makes the heart of a commoner beat like that of a poet.

* * *

Mr. and Mrs. Ray Diaz of Visitacion avenue celebrated their first wedding anniversary Sunday of this week. Many friends visited the couple and extended best wishes to them.

* * *

Dot Mundersbach Faulker's little son Jimmy celebrated his first birthday last week end. Dot is proud of her sonny boy.

* * *

Helen Fosberg smiles happily now that she has her new "pearlies."

* * *

Many signs of prosperity in Brisbane evidences the fact that this community is headed for better and happier times. Many houses have been improved and several new ones built. A number of local people have bought new cars. Bob Booth and Ira White purchased new automobiles within the past few weeks.

* * *

Mr. and Mrs. Nils Spar are visiting Mr. and Mrs. Joe Fount of Sierra Point road. Spar has a record of 20 years service as captain of sea going freighters. He has sailed the seven seas and visited the birthplace, Isnello, Sicily, of your correspondent. Cap Spar saw three years of service as a lieutenant commander in the United States Navy during the war. He and his wife like Brisbane so well they may make a permanent home here.

* * *

Jack Kinney has announced that he will give away the hill of loam located just south of his Alvarado street home. Many Brisbane residents have already hauled away a load or two for their gardens.

* * *

The 3B Club met at the home of Helen John, Monday of this week, and enjoyed an afternoon of bridge. Tuesday evening the group had dinner at a popular San Francisco restaurant.

* * *

Bob "Deadeye" Burns has been showing all the local boys how to shoot ducks, much to their chagrin and expense. Bob says his dad bought him cartridges instead of candy when he was a boy on the plains of Texas.

* * *

"Barnacle" Allen Poss is back from a cruise up and down the coast from San Pedro to Aberdeen. Al now has in his possession his certificate of efficiency as watertender.

* * *

For the past week Al Walland has been recuperating from a severe cut sustained while at work.

* * *

Eleanor Hutchinson and Catherine Core of Daly City, with Bill Strassburger and friend, motored to San Jose on a pleasure trip Sunday of this week. Both young ladies are quite prominent in student affairs at Jefferson Union High School.

* * *

Bert Coulter seems to have enjoyed his four months of married life. To date he has shown no signs of being henpecked or such and friends all hope he and the Mrs. will continue to be as happy as at present.

* * *

Wally Delbon is still planning that trip to Albuquerque. We seem to recall he planned to go last year but lost out at the last minute.

* * *

The Earheart Memorial Tree, a koster blue spruce, will be planted on the school grounds Wednesday of next week at 3 p. m. Ione Kinney will dedicate the tree. All Brisbane residents and friends are invited to attend the ceremony.

Better Fire Fighting Co-operation Had

With experience gained from the million dollar Butano Forest fire disaster of last fall, plans for the better co-ordination of fire fighting forces of San Mateo, Santa Clara and Santa Cruz Counties during the coming dry season were being formulated this week.

County Fire Warden Bert L. Werder attended a meeting of fire-fighting officials of the three counties, yesterday and today, at Big Basin, Santa Cruz County.

At the same time Werder announced an agreement between the county and the emergency conservation works for the use of civilian conservation camp crews during the 1937 fire season. The area of responsibility, which formerly ran from the Santa Cruz County line to Beresford has been enlarged from Beresford to Burlingame and westward to Rockaway Beach.

Benefit Whist Held At Northbrea

A successful whist party was given by the Northbrae P. T. A. Friday evening of last week at the Northbrae School for the benefit of the milk fund for undernourished children.

The door prize was won by Mrs. Erma McClure and the bacon was awarded to Grace Allred.

The high score prizes were awarded to Eva Pallo, Mrs. William I. Farmer, Leona De Maules, Mercedes Carlin, Mrs. F. Allen, H. P. Loustaunau Sr., Mrs. Cauley, Mrs. L. Jordan and Mrs. L. Osmers.

* * *

A good crowd of players attended the Social Club whist party held on Friday evening of last week. Winners were Vera Blair, Joe Devlin, Ione Kinney, Bill Wimmer and Melvin Johnson. Helen John won the wheel prize.

* * *

Mr. and Mrs. Tony Valentine and family visited Brisbane last Sunday and called on their many friends.

* * *

If you entertain, go on a trip, have a birthday or get married—or any of your friends do such things—that's news. Bring your news to Phil and let everybody know what everybody else is doing.

Stars, Songs And Flash Of Newness

ADOLPHE MENJOU, ARLINE JUDGE (center) and DIXIE DUNBAR are an entertaining trio in Twentieth Century-Fox's musical triumph, "One In A Million," which introduces SONJA HENIE to the screen.

Brisbane Realtor Taken Ill Monday

Arthur Annis, popular Brisbane real estate agent, was taken seriously ill at his home in San Francisco Monday of this week. He was rushed to the hospital, where attendants diagnosed appendicitis and operated immediately.

Although Annis is recovering rapidly, it will be at least three weeks before he will be able to return to work. Harold Annis, son of the realtor, and the tract office staff are carrying on routine work at the Brisbane office.

San Mateo County To Enter Float

San Mateo County will have an elaborate float in the day and night parades of the Golden Gate Bridge Fiesta in San Francisco, May 27 to June 2.

William C. McCarthy, county publicity director, announces the float will be of floral design with a queen and court riding on it and 12 of the loveliest girls in the county walking ahead as an escort.

County Road Tax Levy May Be Made

Return of a road tax was advocated recently by the Board of Supervisors as a means of making possible needed improvements to the San Mateo County highway system.

Supervisors Fred E. Beer, James S. James and Alvin Hatch appear in sympathy with such a levy, explaining a 5 or 10 cent tax would take care of the needed expenditures. They pointed out that before the county shared the gasoline tax there was a road tax that was as high as 50 cents.

The road tax was advocated after County Engineer Urban S. Marshall appeared before the board for approval of an $80,000 bridge construction program. Fifty-five per cent of the cost would be borne by the government under the Farm to Market Road program, he said.

The 10 bridges that Marshall seeks to replace are between 25 and 57 years old. He said they are all unsafe and liable to cause the county to be confronted with a big damage suit.

V. F. W. Auxiliary Entertains Whist

The V. F. W. Auxiliary of San Bruno entertained at a whist party, Saturday evening of last week, at the home of Mrs. Jeanne Berg.

The door prize was drawn by Alfred Mose and a second prize by W. A. McClure.

High score awards went to Ethel Harding, L. Tournahu, Mrs. William I. Farmer, Genevieve Preston, Alfred Mose, Jim Moser, Gilbert Thornton, Bobbie Poitros, Helen Madden, Mercedes Carlin, W. A. Mcclure, Emily Williford, H. P. Loustaunau Sr., Mrs. L. Tournahu and Bert Moser.

Others present were Mrs. Mulvaney, Mrs. Berch, Julia Salmirs, Jack Maxwell, Lily Thornton, Carl Lawrence, Wanda Moser, Hazel Chase, Mrs. Sadie Bowman, Erma McClure, Violet Church, Mrs. MacLeod, Ruby Keller, Carmen Lawrence, Mrs. Rogers, Mrs. Robert Thornton, Katheryn Williams and L. W. Preston.

Following the game refreshments were served by the hostess.

School Bus Crashes Down 35 Per Cent

A decrease of 35 per cent in the number of school bus accidents in 1936, and a similar reduction in the number of children injured in these accidents, as compared with 1935, was announced today by the director of the State Motor Vehicle Department.

Two thousand school busses, carrying 75,000 children to and from school, were involved in nineteen accidents, injuring eighteen, with one fatality, as against 29 accidents, 28 injuries and one death during the previous year.

BRISBANE P. T. A. PUBLICITY BOOK IN FIRST PLACE

Nineteen Other Units Make Entries—Locals Rated 100 Per Cent

(Continued from Page 1)

ries publicizing P. T. A. activities in chronological order, published photos of the president, a complete index, inside publicity, an appendix which gave a perfect record of work for the year and neatness of the book with appropriate art work.

PROGRESS

A brief review of the Brisbane publicity book discloses much progress in the unit during the past year. There was a 60 per cent increase in membership, including 30 father members. A basketball court was erected, 60 folding chairs were purchased, six lunch tables made and a large American flag donated to the Brisbane Elementary School. Hot lunches were served to school children during the winter and the pupils were entertained at a Christmas party and picnic. A founders tree and shrubbery were planted on the school grounds. Twenty-five children were given shoes and clothing. A bundle drive was held. Under competent instruction, adult education and gym classes were held.

SOLDIERS KILLED

Twenty-three British and Indian troops, including two British officers, were killed and 41 wounded in a battle with tribesmen last week at New Delhi, India.

The skirmish occurred on the northwest frontier.

P. T. A. To Install New Officers

New officers for the fiscal year 1937-38 will be installed at the regular meeting of the Brisbane P. T. A. to be held Thursday of next week at 8 p. m. in the school auditorium.

Mrs. Margaret Weller will be installing officer. Members and friends are invited to attend the meeting.
